TIMING NATURE

TECHNICAL SPECIFICATIONS AND FUNCTIONS

CASE. Ø 44,2 mm.

GLASS. Scratch-resistant domed sapphire crystal with anti-reflection coating on both sides.

CASE BACK. See-through engraved case-back with flat sapphire crystal.

WATER-RESISTANCE. 10 ATM (100 meters).

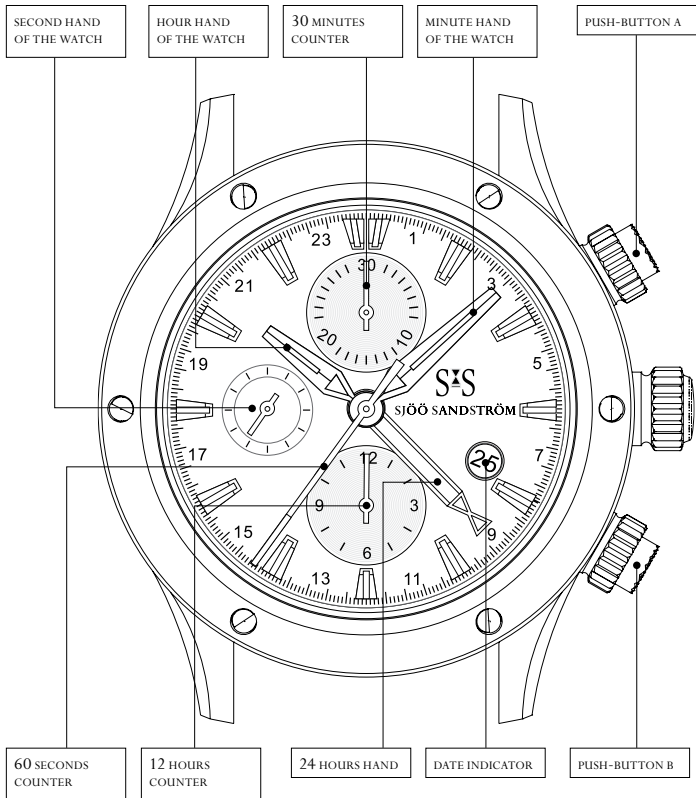

PUSH-BUTTONS AND CROWN. Screwed push-buttons and crown with logotype.

DIAL AND HANDS. Metal index and luminous marks.

RUBBER BRACELETS. Integrated with buckle.

LEATHER BRACELETS. Leather with engraved logotype on buckle.

STEEL BRACELET. Massive stainless steel bracelet with engraved logotype on end-piece.

SETTINGS

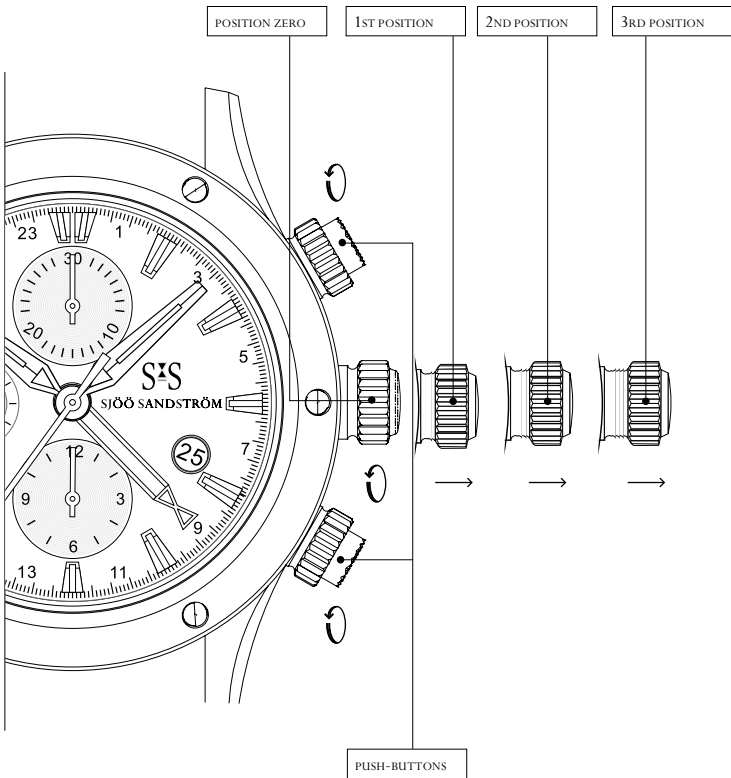

1ST POSITION. This position allows you to wind up your watch manually. *This watch is selfwinding by the movements of the wrist.*

2ND POSITION. Turn the crown counter-clockwise to set the 24 hour hand and clockwise to set the date.

Warning: Do not force the quick date corrector during 8 p.m. and 2 a.m. This could damage the calendar mechanism.

3RD POSITION. Turn the crown counter-clockwise setting the local time. *Remember to always push the crown back to 1ST position and tighten the screw clockwise back to final position zero. Always have the crown in position zero while submerged under water.*

PUSH-BUTTONS. Turn the push-buttons clockwise to be able to push them.

TIMING MODE

—

START, STOP AND RESET TO ZERO.

Unscrew the pusher counter-clockwise and press when starting, stopping and resetting the Chronograph. Make sure that the

push-button is tightened after using the functions of the Chronograph. Do not use the push-buttons while submerged under water.

START/STOP

RESET TO ZERO

WARRANTY

Every Sjöo Sandström wristwatch is hand assembled with the purpose of functioning perfectly from the day of purchase and for a long time to come. This two year international warranty covers any defects in the material and workmanship of your watch at the time of delivery.

To validate Your warranty, the enclosed international warranty card must be dated and stamped by an official Sjöo Sandström retailer at the time of purchase.
